

PRODUCT INFORMATION SHEET

BIOSECURITY

VIROCUR

Highly concentrated DEFRA approved peroxygen based broad spectrum disinfectant powder to dilute prior to use in livestock buildings, surfaces, transport, equipment and water treatment.

PRODUCT BENEFITS:

- DEFRA approved for Foot and Mouth, Swine Vesicular Disease, Diseases of Poultry and General Orders
- Effective against bacteria, moulds, fungi and viruses
- Highly concentrated for low cost per application
- Non-corrosive when diluted

USAGE GUIDE:

- Multi purpose biosecurity system
- Use to disinfect vehicles, surfaces and equipment
- Ideal for use as a disinfectant boot dip
- Use for disinfection of water header tanks
- Unaffected by water temperature or organic challenge
- Highly concentrated and convenient to use
- Degrades naturally within the environment

INSTRUCTIONS FOR USE:

- **Terminal surface and equipment Disinfection:**
- Use at 0.5% dilution (500g to 100 litres water) and apply through pressure washer at 300ml/m².
- **Water Sanitation:** With livestock absent, drain header tank and fill with clean, cold water. Add Virocur at 0.5% dilution (500g to 100 litres water). Leave for 1 hour, drain and flush with clean water. When animals present, dose the header tank daily with a 0.1% SOLUTION (100G PER 100 LITRES WATER).

Sizes Available:

- 5kg - Code P416
