

Country Brand Animal Fencing

Country Brand Animal Fencing is manufactured in the UK by a leading manufacturer of steel wire fencing and associated products.

- Manufactured to BS EN 10223-5
- Wire produced to BS4102
- Heavily galvanised to BS EN10244-2 Class A

Quality - Innovation - Value

'L' GRADE - is a light grade of fence for small animals or temporary fencing.

Wire Diameter (mm)	Minimum Tensile Strength (N/mm ²)	Wire Diameter (mm)	Minimum Tensile Strength (N/mm ²)	Wire Diameter (mm)	Minimum Tensile Strength (N/mm ²)
2.50	695	1.9	695	1.9	695

'C' GRADE - is a high quality medium grade of fence suitable for most applications. A cost effective and durable fencing solution available in a wide range of industry recognised patterns. Larger 500 metre rolls are available. 100% recyclable.

Wire Diameter (mm)	Minimum Tensile Strength (N/mm ²)	Wire Diameter (mm)	Minimum Tensile Strength (N/mm ²)	Wire Diameter (mm)	Minimum Tensile Strength (N/mm ²)
3.00	695	2.50	695	2.50	695

'HT' GRADE - produced using high tensile wires is the preferred option when a stronger longer lasting fence is required. Country Brand high tensile wires typically have at least an 70% higher breaking strain than medium grade wires of the same diameter.

Wire Diameter (mm)	Minimum Tensile Strength (N/mm ²)	Wire Diameter (mm)	Minimum Tensile Strength (N/mm ²)	Wire Diameter (mm)	Minimum Tensile Strength (N/mm ²)
2.50	1235	2.50	1235	2.50	695

UK manufactured to the latest E.U. standards from high quality wire, makes Country Brand Animal Fencing the brand of choice for the discerning buyer and/or user.

HAMPTON™

BRITISH WIRE FENCING SYSTEMS YOU CAN TRUST

Working Together to Succeed!

Barbed Wire

Manufactured to BS EN 10223-1
Wire produced to BS4102
Heavily galvanised to BS EN10244-2 Class A

Mild Steel and High Tensile

Tensile	Line Wire (mm)	Barbing Wire (mm)	Twist	Typical Roll Length
Mild Steel	2.50	2.00	Conventional	200
High Tensile	1.60	1.45	Reverse	200 to 2000
High Tensile	2.00	1.90	Reverse	200 to 2000

Staples

Wire produced to BS4102
Heavily galvanised to BS EN10244-2 Class A

Available in plain or barbed format

Typical Wire Diameters	Typical Unit Weights
2.0mm to 6.0mm	0.5kg to 25kg

Line Wires

Wires produced to BS4102
Heavily galvanised to BS EN10244-2 Class A

Grade	Tensile	Typical Wire Diameter (mm)	Typical Coil Weights (kg)
Galvanised	Soft: 350-550 N/mm ²	1.6 to 4.0	0.5 to 25
Galvanised	Hard: 695-850 N/mm ²	2.0 to 4.0	5 to 25
Galvanised	High Tensile 1050 N/mm ² min	1.6 to 3.15	5 to 25

Hampton Metal Strainer Systems

Available in box and angle strainer options

- Suitable for fences up to 2.6 metres high
- Easy direction changes
- Superior strength and durability
- Lasts for over 30 years in normal conditions.

Intermediate Metal Post System

- Strong - high tensile steel posts
- Suitable for all fence patterns
- Will last for over 30 years in normal conditions
- Staples can be fixed at any point on the post.
