INTRODUCTION AND BACKGROUND TO COUNTRY UF

We are delighted to be able to supply members with this new Country UF product information folder, which provides you with a complete reference guide for the entire Country UF range. The folder has been collated into three main categories: Animal Feeds, Animal Health and Retail. Within these sections you will be able to view key product information, including the contact details to be used for placing orders.

Over the following pages you will also see that Country UF, first established in 2008, has gone from strength to strength and now delivers a fantastic range of products across a number of sectors.

Country UF belongs to you; it belongs to the 25 United Farmers members who provide crucial services to rural communities across the UK. By extension, it also belongs to the thousands of farmers who support their local farming co-operatives and businesses that form United Farmers. Because of this special relationship, Country UF has been established to deliver mutual benefits across the entire agricultural industry.

Our aim is to deliver the best, most practical products for the best possible price. You will see that we have used the words “best”, “highest quality” and “customer needs” frequently throughout this folder. We do not use those terms lightly, but quite simply they typify what we are working to deliver when we develop Country UF products.

To achieve our goal, we have a group of six-member specialist buying teams, who are hugely experienced across different product areas such as animal health, farm retail and equine. Part of the teams’ remit is to come together to identify areas where a Country UF product could deliver value to our entire membership and the communities they serve. This may be driven by a need to fill a product gap in the market or provide our members with a competitive advantage by supplying a high quality product for the best possible price.

Working with leading manufacturers and suppliers in these areas we have now delivered over 180 product lines using this ethos.

The collective strength and commitment of United Farmers members allows us to consolidate our purchasing to these products and to benefit your customers and your company.

Country UF... The Best For Less!

Equine Feeds

Each product in this range has undergone lengthy consultation with our Equine Member Specialist Buying Team, which has allowed us to deliver products and specifications of the highest quality.

By partnering with trusted and experienced manufacturers, we have been able to provide products proven in the marketplace that have been manufactured in accordance with BETA-NOPS and UFAS regulations. The steps we have taken in developing these products allow you complete confidence in selling the range to your customers.

Product Horse Beet

Product Number UFBEET

Barcode 5060225640059

Order Qty 50x20kg

Key Product Benefits

- Fast and convenient to prepare - under 10 minutes
- Ideal fibre source for horses/ponies prone to Laminitis
- Suitable for Summer and Winter feeding
- Good source of slow-release energy
- Non-GM
- Can help reduce starch levels in the diet
- Minimal starch
- Molasses free
- Grown by British Farmers

15-month product shelf life

Product Specification

DE MJ/kg 12.0%	Sugar 5%
Protein 9.0%	Starch zero
Fibre 16.5%	Oil 0.7%
Ash 9.0%

Pig Feeds

This project was identified by our Companion Animal Member Specialist Buying Team, who carried out extensive research into the required range.

Working with the support of a number of nutritionist experts, we have been able to deliver a product range with high quality specifications that provides key nutritional requirements at each crucial development stage of the animal.

The Early Grower and Grower / Finisher products are available in pellet form, with the Sow and Weaner available in either Roll or Nut.

Product Early Grower Pellets

Product Number 11585

Barcode 5060225640257

Order Qty Full/Mixed Pallet (appx. 50 x 20kg bags)

Key Product Benefits

- 5-month shelf life
- Complete feed for weaned pigs from 6 to 12 weeks of age

Product Specification

Protein 17.5%
Lysine 1.05%
Oil 4%

Fibre 4.5%
Ash 6%

Product Grower/Finisher Pellets

Product Number 11586

Barcode 5060225640264

Order Qty Full/Mixed Pallet (appx. 50 x 20kg bags)

Poultry Feeds

This was another product area undertaken by our Companion Animal Specialist Buying team. The focus of this project was to deliver a premium range of the highest quality, in a presentation style that would showcase the products. We achieved this by including a window in the product packaging allowing the consumer to see the feed. This is particularly striking in the Mixed Poultry Corn, which is oil coated and has a formulation of 55% wheat and 45% corn. This specification not only means that the volume of yellow corn looks appealing in the product packaging, but we believe this is absolutely one of the best mixes on the market.

Since launch members have doubled their sales on these products, which is testament to the product quality and levels of customer satisfaction.

Product Layers Pellets

Product Number 11582

Barcode 5060225640011

Order Qty Full/Mixed Pallet
(appx. 50 x 20kg bags)

Key Product Benefits

Dog & Cat Food

Following member requests, the Companion Animal team were tasked with modernizing this range of pet food. Their goal was to deliver an appetizing and tasty feed that provided the important minerals and protein levels required for cats and dogs. As well as improving the specifications of the range, we again opted for stylish window packaging to showcase the products.

The range includes a variety of dry and wet food to suit both the working animal and domestic pet.

Product Active Diet Dog Food

Product No. UFACTIVE24%15KG

Barcode 5011335000295

Order Qty Full/Mixed Pallet (appx. 65 x 15kg bags)

Iodine

Given the importance of effectively sterilizing the navel of newborn lambs, we have opted for a product that is historically proven in quality and performance, providing the highest strength and results with this 10% BP formulation.

There are a number of cheaper Iodine's on the market, which claim to be "strong" but do not compare to this formulation. We made the decision to keep the high spec 10% BP formulation which is the most expensive, but effective product available. We believe this is the best product for the drying of lambs' navels and the right product to supply to our farming customers.

Product 10% Strong Iodine - 500ML

Product Number 6678

Mineral Drenches

Our Animal Health Specialist Buying Team decided to look at this product area as they felt there were too many brands available in the market, which left some farmers unsure as to what products were required. The team's goal was to provide the highest standard of chelated minerals at the highest possible specification for the animal, and we believe that we have achieved that with this range.

We have been delighted with the feedback from customers who have provided testimonials confirming fantastic results when using these products.

Milk Powders

We currently offer two milk powders in the Country UF label. Kalvostart Unique is exclusively available to United Farmers members and cannot be replicated or supplied to any other account in the UK. This third generation milk powder combines whey and casein, helping clot milk in the calf's system. This unique formulation has delivered fantastic results across the board.

Due to the superior quality and unique formulation of Kalvostart Unique we would advise that animals are not substituted or swapped onto any other whey or skim milk powder abruptly. Any change should be slow and mixed over a 10-day period.

Product Kalvostart Unique

Product No. 188404137

Barcode 5060225640073

Order Qty Full pallet
(approx. 70 x 20kg bags)

Key Product Benefits

- Optimal ratio premium milk proteins caseinate and whey for high growth and weight gain.
- Enriched with bio-active lactoferrin.
- Contains Imagro® health concept, actively supports a healthy microflora in the intestine and suppresses pathogenic micro-organisms.
- Bucket and machine feeding.
- Once and twice a day feeding.

Product Specification

Protein 22 %	Calcium 0.63%
Spray dried fat 17%	Vit A 16.000IU/kg
Minerals 8.5%	Vit D3 4.500 IU/kg
Crude fibre 0.0%	Vit E 300 ppm
Lactose 45.5%	Vit C 120 ppm
Lysine 1.89%	

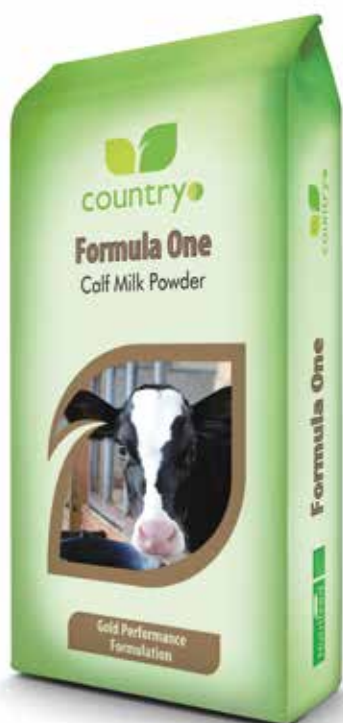

Formula One Calf Milk Powder is a whey based powder with a top end specification that makes it one of the best products available on the market. The inclusion of Imagro provides healthy bacteria which aids digestion.

ANIMAL HEALTH - FREE ACCESS MINERALS

Free Access Minerals / In-Feed Mix It Minerals

Our Mineral Specialist Buying Team looked to consolidate to a high spec essential range of minerals to suit our customers' needs. The two areas that were identified were Free Access, where animals in the field take the flavoured minerals as they desire, and In Feed Mix-It Minerals, which can be blended with silage or haylage and fed to livestock. The two types of bagged minerals are clearly identified by different coloured bags (Free Access Minerals - Green and In Feed Mix It Minerals - Blue). Both products then identify the type of mineral make up with a unique colored label on the back of the bag. If a farming customer requires an individual specification for their needs, then this can also be produced with a special white label on the bag bearing the customer's name. Please see table below for further information.

All specifications have been formulated by nutritional experts to ensure excellent results.

Product Free Access Minerals

Order Qty 20 x 25kg bags

Orders can be placed for 10 x 25kg bags but will incur a small mixing charge

Mineral Blocks

This range was again investigated by our Mineral Team with the aim of providing a range of high quality products. Working with nutritional experts we have developed a Salt Block, Salt Block with Copper and Trace Mineral Block.

A great alternative to drenches for animals grazing in a field environment and where handling facilities are not readily available, these products have been formulated to support farmers in maintaining healthy animals who reach their optimal growth and reproduction levels.

Product Salt Block

Product No. 10296555

Order Qty 50 Packs of 2x10g

Product Specification

Iron as Oxide	720.000	mg/kg
Manganese as Oxide	200.000	mg/kg

Colostrums

The Animal Health Member Specialist Buying Team looked at various options during this project, before ultimately deciding to go with a proven product that had delivered excellent results in the field and that is popular amongst farmers.

We chose a highly respected manufacturer that has been formulating this colostrum for over 20 years and offers a reliable source of essential elements for new born animals.

Product	Product No.	Barcode	Outer Qty	Key Product Benefits
Lamb Colostrum - 12 x 50g	QUFL100	5055331600646	14	<ul style="list-style-type: none">Contains probiotics which physically exclude harmful pathogens from attaching to the gut wallFortified with egg powder to supplement the high level of natural colostrumContains vitamins A, D3 & E to counter common deficiencies in lambsHigh levels of easy-absorbable energyFormulated to mix easily and sealed in a foil sachet for preservation of nutrients
Lamb Colostrum - 500g	QUFL500	5055331600660	27	
Lamb Colostrum - 1.25 kg	QUFL-125	5055331600639	6	
Lamb Colostrum - 2.5 kg	QUFL200	5055331600653	3	

Product Specification

Composition: Probiotic (*Enterococcus faecium* 5x10⁹ cfu/25g), milk powder, colostrum powder, egg products. Additives per 25g: Vit E 12.5mg, Vit A 1000iu, Vit D3 125iu.

ANIMAL HEALTH - COLOSTRUMS

ANIMAL HEALTH - LAMBING RANGE

This was another area which our Animal Health Team felt was saturated with multiple products, causing confusion and resulting in misguidance for farmers. As a result, the team combined a number of products into one, providing farmers with a cost effective solution containing all of the requirements for new born animals.

These products have been made available in a number of different presentations such as liquid squirt applicator, capsule, powder and paste. This provides multiple options for the farmer ensuring we have the right product for everyone's needs.

Product Newborn Lamb 5 in 1 - 100ml

Product No. UFNBL100

Barcode 5055331601605

Outer Qty 20

Product Specification

- For use at birth, following digestive upsets and at times of stress
- To kickstart and aid new-born lambs
- Convenient size bottle and easy-to-use dispenser
- High levels of available energy
- Added vitamins to aid thriftiness and egg powder for a healthy gut

Composition: Energy, egg products, colostrum powder.

Additives per 100ml: Vit A 62,500iu, Vit D3 17,500iu, Vit E 250mg, Vit B12 25mg, Vit B3 337.5mg, Vit B1 775mg, Vit B2 162.5mg, Vit B6 125mg, Zinc 100mg, Manganese 17.5mg, Iron 5mg, Iodine 45mg, Cobalt 2.25mg, Selenium 1.1mg.

Product Twin Lamb 4 in 1 - 500ml

Product No. UFTL500

Barcode 5055331601599

Outer Qty 12

Product Specification

- For use at first sign of fatigue and in cases of twin lamb disease
- Formulated for the ewe close to lambing
- High levels of available energy
- Added vitamins and trace elements to counteract deficiencies due to stress of pregnancy
- Appetite stimulants to encourage feeding

Composition: Energy and appetite stimulants.

Additives per 100ml: Vit A 64,000iu, Vit D 16,000iu, Vit E 700mg, Vit B12 0.312mg, Vit B3 55mg, Zinc 130mg, Manganese 60mg, Iron 60mg, Iodine 100mg.

Coal

On this range we have partnered with one of the largest suppliers in the UK, who provide us with a proven and reputable product.

With an excellent British Thermal Unit (BTU) heat output, this product is consistent in quality and doesn't suffer from excessive sparking issues experienced with some other cheaper imported products.
