

Country UF Horse Alfalfa

Key product questions and answers

Q. What is United Farmers Horse Alfalfa?

A. Country UF Horse Alfalfa is a high quality mix of British grown and dried Alfalfa and finest Soya Oil with the addition of apple pieces to increase palatability. The whole Alfalfa plant (stem, leaves and flowers) is included so providing the optimum nutritional levels for all horses and ponies in a premium quality high fibre, low starch feed. The natural levels of micronutrients found in Alfalfa enhance general well being and have been found to be especially useful in the maintenance of a healthy gut and foot health.

Q. Why should you feed United Farmers Horse Alfalfa?

Horses have evolved to live mostly on a forage based diet 'trickle feeding' for up to 18 hours a day. This evolutionary adaptation has led to their digestive system requiring an almost continuous supply of forage that is high in fibre. A high quality fibre feed such as Country UF Horse Alfalfa provides a good and nutritious source of fibre and bulk in the horse's diet. It can also aid digestion and help in fulfilling the horses psychological need to chew.

Q. Can it be fed to horses with Recurrent Airway Obstruction?

Recurrent Airway Obstruction (RAO) has previously been known as COPD or Chronic Obstructive Pulmonary Disease requires horses to have an environment as dust free as possible. Country UF Horse Alfalfa is dressed with a light dressing of soya oil to ensure that all leaf particles are sufficiently large enough to be safe for horses and ponies suffering from RAO.

Q. Can it be used on its own?

Country UF Horse Alfalfa can be fed on its own and is useful as a quality fibre addition to cereal and other compound feeds.

Q. How should United Farmers Horse Alfalfa be stored?

Country UF Horse Chaff Light should be stored in a cool dry place away from direct sunlight and protected from vermin.

Q. The bag has a BETA NOPS logo what does this mean?

The logo represents a code of practise and is issued by the British Equine Trade Association (BETA). It demonstrates that the manufacture has produced the product within strict guidelines so as to minimise the risk of Naturally Occurring Prohibited Substances (NOPS) being present.

Q. How much does a bag weigh?

Country UF Horse Alfalfa is in a 15kg bag.
