

Why Grubs®?

Grubs® is the result of investment into the most advanced materials and technology on our mission to create the most comfortable footwear available in the field.

All our boots are made to the highest quality standards to meet our exacting requirements.

This is nothing new, as eight generations of our family have been crafting the finest sports footwear since 1776. Joe Foster, my Great Grandfather,

was a founding member of AAA, hand making shoes for the Olympic stars of 1924; Harold Abrams and Eric Liddell, featured in 'Chariots of Fire'. My Father and Uncle founded Reebok in 1960 and I was part of the team that created the iconic aerobic and fitness shoes that the company is renowned for.

My wife, Jan and I created the neoprene revolution in sports and agricultural boots back in 2000. At Grubs® our tradition guides us to provide you with the most comfortable performance footwear available today.

**"We sell comfort, whatever the weather.
Our boots are the most comfortable you will wear."**

A handwritten signature in black ink, appearing to be "John" or "J. Grubbs".

We are a British brand with a global reach

Grub's® technology

We develop all Grubs® boots based on four brand attributes:

Comfort, Warmth, Waterproof and Grip.

All Grubs® boots have these unique selling points making them superior products.

COMFORT

- Stretch boot shaft made from 5mm **INSUFOAM-ULTRA™** allows the boot to fit almost any calf.
- 6mm **NITROCELL™** footbed provides soft underfoot cushioning for an athletic shoe feel.
- **HEXZORB™** technology absorbs heel strike shock for day long comfort.
- **SUPERDRI™** lining wicks moisture away from the wearer's foot to prevent a sweaty and uncomfortable feel, it is fungus and rot proof so will not smell like cotton lined boots.

WARM

- 6mm **NITROCELL™** footbed has a million microscopic nitrogen bubbles that insulate the wearer from cold surfaces.
- **5.0 Technology**
The full bootie lining wraps the entire foot in 5mm **INSUFOAM-ULTRA™** for a comfort range of -20°C to +30°C.
- **8.5 Technology**
The full bootie lining wraps the entire foot in 8.5mm **INSUFOAM-ULTRA™** with the addition of our 3mm **HIGHLOFT™** space insulation for a comfort range of -40°C to +15°C

WATERPROOF

- Double tested in production at bootie and final quality check, all our boots are waterproof to the very top.
- Our range of soles are designed to give sure-footed grip on a range of surfaces.

GRIP

5.0 TECHNOLOGY

Tough texturised nylon face with a durable water shedding finish
5mm light buoyant insulating foam
SUPER-DRI™ moisture wicking terry knit lining

8.5 TECHNOLOGY

Tough texturised nylon face with a durable water-shedding finish
5mm light buoyant insulating foam
3mm **HIGHLOFT**
Polyester fleece lining

HEXZORB™ TECHNOLOGY FOR SHOCK ABSORPTION

A hexagonal shock-absorbing component is directly moulded into the heel of the outsole, to dissipate shockwave travelling up through the wearer's leg.

Great grip!

Grub's soles have been designed to give superior grip over a range of surfaces.

TRAXION™ KI40?FE™
TRAXION™ (DURAPRENE™ rubber).
Oil resistant and passes
TM144: 1999 slip resistance test.

- :h'f qedW + Xhedk**
Multiple small lugs give maximum purchase as the foot pushes off.
- Medial stability lug**
Balances the foot as it rolls onto the ball.

- Grip zone - heel**
Multiple small lugs give maximum purchase during heel strike.
- Traction**
Large lugs help propel the foot forward.
- Lateral stability lug**
Balance the foot as it moves forward.
- Braking**
Prominent heel for downhill braking.

TREDZ™
TREDZ™ (DURAPRENE™ rubber).
Oil resistant and passes
TM144: 1999 slip resistance test.

- Stability**
FOOT-FRAME™ provides stability and increases torsional resistance in the arch.
- HEXZORB™ technology** moulds a shock-absorbing component into the heel.

- Grip zone**
Our TWIST-GRIP™ studs bite into soft surfaces.
- Traction**
Large blocks feature moulded SIPPING, acting like small grooves on a tyre, to expel liquid and increase contact with the ground, reducing aquaplaning.

TRAX™
The TRAX™ (DURAPRENE™ rubber).

- :h'f qedW + Xhedk**
Multiple small lugs give maximum purchase as the foot pushes off.
- Medial stability lug**
Balances the foot as it rolls onto the ball.
- Grip zone - heel**
Maximum purchase for the heel strike.

- Traction**
Large lugs help propel the foot forward.
- Lateral stability lug**
Balance the foot as it moves forward.
- Braking**
Prominent heel for downhill braking.

VIBRAM™
The VIBRAM® sole has a self-cleaning open design to provide traction and safety, with a rockered profile for easy foot motion, especially on flat terrain.

- Grip zone**
Multiple small lugs give maximum grip.

- Traction**
VIBRAM® Multitraction lug provides traction at 360°.
- Stability**
Large lugs for added stability.
- Braking**
Undercut heel for downhill braking.

TRAK™
The tread gives superior grip, cutting into soft ground, mud and snow.

- Grip zone**
Front and rear: Multiple small bars give maximum purchase during push-off and heel strike.

- Traction**
Deep tractor like tread cuts into soft earth and snow for maximum grip.

Stability
Reinforced side wall and flared sole balances the foot as it rolls onto the ball.

Braking
Prominent heel for down hill braking.

OUTLINE OUTLINE™
The OUTLINE™ sole is designed especially for the equestrian market.

- Trim toes**
No toe extension to the sole for easier entry to the stirrup.
- Positive heel**
The 90° heel stops the foot sliding through the stirrup.

- Grip zone**
The GRIP-GRID™ pad, grips the stirrup for better heel position and greater control.

Cuffed arch
Supports the heel in the stirrup.

HexZorb
Reduces shock to the leg and lower back when dismounting.

VIBRAM SPORT-EQUESTRI™ or SE™
A cupped ball and heel are paired with a slim arch and VIBRAM® S-LINE™ natural foot movement design that works with the foot.

- Traction**
Traction helps propel the foot forward.
- Self cleaning**

- Grip zone**
Toe bumper for foot protection and grip.

Stability
Broad lugs for maximum stability.

YARD™ (DURAPRENE™ rubber).
Designed for use in stables and yard with a classic heeled profile.

- Trim toes**
No toe extension to the sole for easier entry to the stirrup.

- :h'f qedW**
Multiple small ripple bars for grip on hard surfaces and stirrups.

Prominent heel for the stirrup

Frostline, three exciting colours added to our classic wellington

Grubs® FROSTLINE™ is an insulated and waterproof wellington with excellent grip properties, suitable for general use. This high performance insulated field boot is suitable for sustained periods in temperatures as low as -20° C.

These boots have our TRAX™ (DURAPRENE™ rubber) outsole, giving superior grip on a variety of surfaces and features our HEXZORB™ technology.

The wellington reinvented

RAINLINE™ is our first rainboot to combine Grub's® unique **SUPERDRI™** technology in a rubber boot.

Grub's® **RAINLINE™** use a lightweight, easy-clean, rubber shell in a classic field boot style. The full stretch panel in the shaft, gives great calf fit, is neoprene and completely waterproof.

A printed **SUPERDRI™** moisture-wicking lining uses thousands of fibre loops to cosset the foot and wick away moisture, keeping the wearer dry and comfortable, providing an unequalled comfort range without sweat and heat build up.

Grub's® **RAINLINE™** boots feature a removable 6mm **NITROCELL™** footbed that adds further insulation and cushioning due to its microscopic closed cell nitrogen bubble structure, giving the wearer superior thermal protection from cold surfaces.

Our excellent new **TRAX™** (**DURAPRENE™** rubber) outsole, gives superior grip on a variety of surfaces and features our **HEXZORB™** technology.

HIGHLINE™ is a boot with a traditional profile but comfort and stability way ahead of the competition. Equally at home in a farm yard or walking the dog the **HIGHLINE™** boot is highly rugged boot with go anywhere grip.

Full height rubber shaft with a side below and securing strap let the boot fit most calves. 4mm rubber foot with reinforced heels and **UNDERFOOT CHASSIS™** give class-leading stability while the **TRAK™** sole gives powerful traction on soft ground.

HIGHLINE™: Sage Green, Mahogany.

RAINLINE™: Aubergine.

Agriculture, serious everyday boots bringing you comfort and protection

Grubs® **Fenline™** provides a totally waterproof boot that can be used in sustained temperatures down to -20° C to +30° C in total comfort.

These high quality insulated boots are designed with a **TREDZ™** sole pattern and **HARD-TOE™** feature, making the Grubs® **Fenline™** the perfect field and yard boot for agricultural use. The **TREDZ™** sole gives superior grip over a range of surfaces and situations.

Grubs® **Eskline 8.5™** is a classic field boot that is ideal for most work and leisure activities, coming in at the top end of the insulated boot market in terms of specification and is suitable for temperatures between -40° C and +15° C so you can remain outdoors for hours.

Eskline 8.5™ utilises a twin sole construction incorporating **TRAXION™** outsole with **DURALITE™** mid sole **DURAPENE™** technology for more superior grip over a range of surfaces.

FENLINE 5.0™

Ceramic - the world's first rubber boot with a ceramic toe-cap

Grubs® **CERAMIC 5.0 S5™** is the world's first rubber boot with a ceramic toe-cap and safety midsole, passing the safety standard BS EN ISO 20345 S5.

The non-metallic **CERAMIC 5.0 S5™** material conducts neither cold or electricity, is anti-static and does not trigger airport security devices.

CERAMIC 5.0 S5™ combines our Grubs® technology with 5.0 Thermal engineering which is insulating from below -20°C to +30°.

The boot is completely waterproof and our **SUPER-DRI™** moisture-wicking linings keep the wearer dry and comfortable, without sweat and heat build up, so that Grubs® boots meet and exceed BS EN ISO 20344 2004 5.1 standards for ergonomics.

Our excellent **TREDZ™ (DURAPRENE™ rubber)** outsole gives superior grip, is oil resistant and passes TM144: 1999 slip resistance test.

Deep heat for feet

Grubs® **Iceline 8.5™** is a stunning boot from the Grubs® range with a quilted neoprene upper, perfect for those who still want to look great in the worst weather.

Iceline 8.5™ uses a **TRAX™** outer sole for superior grip over a range of surfaces and situations complete with a **HEXZORB™** technology for impact suppression and thermal insulation.

Grubs® **Frostline Sport 8.5™** is a great general activity Wellington, providing you with a waterproof and insulated boot. This outdoor boot is a high performance field boot that is suitable for temperatures as low as -40° C.

Both boots have a **TRAX™** sole, with small lugs front & rear to provide good 'push off' grip and a prominent heel for 'braking' grip. For ultimate comfort this boot has a 6mm **NITROCELL™** that provides both insulation and cushioning.

Equine yard and ride

We have totally updated our offer for 2017. Our new **RAMILO SE™** boot feature a hardwearing yet super flexible **KEPROTEC®**, **KEVLAR®** reinforced upper, that is 100% waterproof but flexes with the wearer while Jumping. Leg movement and ankle rotation is complemented with maximum support from our new **VIBRAM® SPORT EQUESTRI™** sole combined with our **DURALITE™** compound. With stirrup and heel guards designed for riders on the balls of their feet.

The **CILETTO SE™ EQUI-TRAINER™** takes the equestrian lifestyle to a new level of comfort and performance. Waterproof, warm, comfortable with ultimate **VIBRAM®** grip, this is the shoe you wear while eating your cornflakes and don't take off until your back in bed.

Our classic **RIDELINE™** and **OUTLINE™** boots have been refreshed with our corporate logo in Sky Blue, a medial saddle patch on the **RIDELINE™** and a stunning colourful **OUTLINE™** sole. Classic boots have never looked this good.

At the other end of the spectrum the new **SKYLINE™** offers an easy relaxed fit with bags of country style. A quilted leg and colourful **YARD™** for yards and riding.

Leisure and comfort

MIDLINe™ features our 5.0 technology and the **TRAX™** sole with **HEXZORB™** **DURAPRENE™** technology.

Both are ideal boots for most work, leisure or gardening activities.

Grubs® **WOODLINE 5.0™** slipon shoe is a must-have to keep by the door so you easily slip on and off to go out to the garden or garage. This outdoor shoe is naturally lightweight, buoyant and comfortable coupled with an under foot chassis for added support and comfort. You will be amazed how useful the **WOODLINE 5.0™** shoe will be.

WOODLINE 5.0™ slip on has the same insulated sole and upper as the full height Grubs® Boots making these comfortable from -20°C to +30°C (85°F to sub zero).

Grubs® **MUDDIES ICICLE 5.0™** Let the kids go out and play in any weather. The **MUDDIES ICICLE 5.0™** has a warm, 4.5mm fleece-lined, **INSU-FOAM ULTRA™** bootie with a tall rubber overlay to protect little feet from rough and tumble all the way down to sub-zero temperatures.

Accessories

As people constantly tell us Grubs® boots are not only extremely comfortable but very warm even on the coldest days, too compliment them we have introduced **GRUBS®SOCKS™**. A wool and polyamide, polyester **STAY-DRI™** blend keeps the wearer warm while moving foot perspiration to the **SUPER-DRI™** lining of the boot, to keep them dry too. We now have **MCNETT® REVIVEX™** boot spray in stock to protect and restore the rubber of the boot upper, a real must add on to any boot purchase.
