Welcome

Nubuckz for your customers big bucks for you!

There is good reason for Buckler Boots dealers to cheer the arrival of spring 2017. You will soon be able to offer your customers injection moulded full spec, non-metallic rubber outsole safety boots in a choice of lace or dealer styles at only £49.90 RSP! Welcome to **Nubuckz** the new Buckler Boots which will earn you big bucks. (see pages 3 and 4) With the focus of our premium injection moulded **Buckshot** range moving progressively to **waterproof** specifications a great opportunity opens up for a new product offering which retains all the renowned Buckler Boots ingredients of quality style and durability at a price point which will help you take a bigger slice of the mid price portion of the market.

Nubuckz deliveries are scheduled to commence at the end of June. Your Buckler Boots regional sales manager has samples - you will be impressed.

And there is more!

Over the next few months we will also introduce two style additions to the Largo Bay collection which are specifically designed for indoors and lighter duties (see pages 7 and 8).

The latest construction technique used in sports/active footwear uses injection moulded thermo polyurethane uppers and soon we will introduce a trainer and boot style featuring this durable and ultra lightweight construction.

Meantime for those dealers in the independent builders merchants and tools sectors who want to take on the Nationals by deft use of the sidestep, look no further than **Largo Bay safety sneakers** with the first focus on the style **EAZY** (see pages 5). This is a heck of a product and it's here, now and ready.

Buckbootz BBZ6000 the all-year-round safety welly

Many of our dealers know that our famous **Buckbootz BBZ6000 S5** safety wellies sell all year round with the added bonus of peak seasons. For the next peak season we will be introducing BBZ6000 in a striking new orange/light blue colour combination (see page 23).

Many will also know of attempts by competitors to imitate this boot. Imitation, as they say, is the sincerest form of flattery but it doesn't buy our 10 years of continuous development of a great product. Imitation inspires us.

May spring/summer 2017 be good to you all.

Kind regards,

Andrew Duncan, Managing Director, Buckler Boots Ltd

RECOMMENDED SELLING PRICE (RSP)

Safety footwear styles with the exception of shoe styles are exempt from UK VAT. Safety shoe styles and non-safety work boots are subject to vat at the standard UK rate. Please contact us at info@bucklerboots.com if you require further information.

Nubuckz certified to EN standards S3 HRO SRC plus they are **non-metallic**. For the user it doesn't get much better than this - full spec safety boots to non-metallic specifications • cowhide leather • injection moulded construction • rubber outsoles • choice of lace and dealer styles • the latest comfort insole technology. All at a groundbreaking RSP of £49.90zr. **Nubuckz** utilise an injection moulded construction process which provides cost savings without compromise - all backed by Buckler Boots unsurpassed reputation for rigorous testing and quality plus our unique guarantee - **Body and Sole Together Forever**.

New to the **Largo Bay** range, **Baz** and **Kez** both use the latest development in sports/active footwear construction for its inspiration. Injection moulded thermo-polyurethane uppers bond with Buckler Boots own non-marking rubber sneaker outsole to give ultra lightweight, breathable safety trainer and boot styles to EN S1 P HRO SRC non-metallic specification. Baz and Kez are also ESD certified and are scheduled to arrive in UK market in summer of this year.

Designed for lighter and indoors duties these 2 new styles bring real contemporary street style to the workplace.

Buckbootz by Buckler Boots is one of the most recognisable safety footwear products in the UK and Northern European markets. The first ever EN S5 standard boot of this type was created by Buckler Boots in 2007 and launched in the UK and selected mainland Europe markets in 2008.

Ten years of continuous and ongoing development has created a boot which has revolutionised the perception of safety wellies and brought completely new levels of user comfort, safety and durability to thousands of people working in cold, wet and arduous conditions.

The trademark blue/orange launch colourway has become a familiar sight in demanding working environments across the country. Over the years it has been joined by Olive and Black and now we introduce a great looking alternative colourway with prime focus on Orange. **BBZ6000 OR** will be available from Summer/Autumn 2017 onwards

The every day all purpose neoprene/rubber wellington boot for ladies.

Having developed Europe's No.1 neoprene/rubber EN S5 safety wellington boot we like to think that we know a thing or two about neoprene/rubber waterproof boots in general.

For our agri/country dealers we already have our very popular non-safety work boots for men, BBZ5020 and BBZ5060 - the latter features our innovative PropTop™ design - and that is what we've incorporated into a super non-safety boot for ladies - **BBZ5666**. To give the ladies boot the same capacity for dealing with rough outdoor conditions we have fitted Buckler Boots K3 sole.

OUR HEART AND SOLES

At the very heart of a good work boot is a good outsole and there has never been a Buckler Boots style which hasn't featured rubber outsoles.

For us there is no compromising, we can't see past rubber as the prime work boot sole material and we invest heavily in our own rubber outsole development programmes.

Rubber is tough, durable, stays flexible in a wide temperature range and is abrasion, slip, heat (300°C – 60 secs) and oil resistant. It also provides superior grip in nearly every conceivable working situation and is resistant to a number of chemicals.

All the rubber outsoles you can see here have been developed by Buckler Boots. If you think you've seen other soles which look a bit like them then it's probably because some of our competitors have seen and liked them too.

K2

Originally Buckler Boots signature outsole for Goodyear welted boot styles. Probably the toughest sole of its kind available. K2 put down new markers for strength and durability in work boot outsoles. Certified to SRA anti slip standard.

Largo Bay

Even when it comes to bringing the street look to the workplace we insist on real rubber outsoles but - our sneaker soles are different. Mindful of the need for some outsole 'dig' in some working conditions, (even with sneaker style safety footwear) we have created a sneaker sole

with pronounced cleats, wave effect sipes and a slightly raised heel area without sacrificing that great looking sneaker sole side profile. Comes with SRC maximum anti slip test certification too. Clever, good looking and non-marking.

K3

The new generation sole for Goodyear welted leather styles and Buckbootz neoprene/rubber footwear. Features weight saving wave effect sipes and inherits K2's rugged long life characteristics whilst also achieving SRC maximum anti slip test certification. Looks good too.

Antelope

A well established smart looking rubber outsole which is specifically designed for use on Buckler Boots styles which use cement construction. SRC maximum anti slip test certification.

Nubuckz

For our ground breaking new injection moulded Nubuckz safety boot styles we introduce a deep cleated rubber outsole specially designed to interact with the polyurethane top sole in which the Nubuckz ribbed anti scuff toe is an incorporated defining feature. Nubuckz outsoles are heat resistant to 300°C and achieve maximum rating SRC anti slip certification. They are long lasting with rugged good looks.

Buckshot 2

The most exciting Buckler Boots outsole development for some time. Buckshot 2 is featured on our injection moulded Buckshot 2 boot range. It has some of the best anti-abrasion test results achievable. A great looking sole with wave effect sipes, deep cleats and all the outsole

benefits which come with rubber plus SRC maximum anti-slip test certification.

Sole Patterns

"These soles have not begun to wear like others I've purchased in the past and they remain waterproof at all times no matter how harsh the weather.

If you are working in an environment that requires sturdy protective footwear and want a superior quality product then I recommend Buckler every time."

Byron Withers, Buckler Boots dealer HRN Tractors
